***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to electrochemical cells modules.

Group II, claim(s) 8-13, drawn to an electrochemical process.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The electrochemical cells modules are not structurally distinguished by the method steps.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

*In Group I:*

(i) Wherein in use an energy source provides an external continuous current to the porous electrodes such that at the cathode there is H<sub>2</sub> formation and at the anode there is O<sub>2</sub> formation, and in use the electrolyte is an aqueous solution of KOH (claim 6).

(ii) Wherein the electrolyte is an aqueous solution of KOH, electric energy is drawn from the porous electrodes by feeding the gas sides of the electrodes with respectively H<sub>2</sub> and O<sub>2</sub> (claim 7).

In Group II:

(i) Wherein an energy source provides an external continuous current to the porous electrodes such that at the negative electrode there is H<sub>2</sub> formation and at the positive electrode there is O<sub>2</sub> formation and the electrolyte is an aqueous solution of KOH (claim 12).

(ii) Wherein the electrolyte is an aqueous solution of KOH and electric energy is drawn from the porous electrodes by feeding the gas sides of the electrodes with respectively H<sub>2</sub> and O<sub>2</sub> (claim 13).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: See above.

The following claim(s) are generic: **1-5 and 8-11.**

The species listed above do not relate to a single general inventive concept

under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Claims 7 and 13 are directed to a fuel cell and claims 6 and 12 are directed to electrolysis.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
